SKILLS

- Programming Languages: C, Python, Java
- Database Management: DBMS
- Web Development: MERN Stack (MongoDB, Express.js, React.js, Node.js)
- Machine Learning: Artificial Neural Networks (ANN), Convolutional Neural Networks (CNN)
- Other Skills: Data Structures, Problem Solving

LANGUAGES

- Telugu (Native)
- Hindi (Fluent)
- English (Fluent)

PROFILE

Aspiring software engineer with a strong foundation in programming, database management, and machine learning concepts. Passionate about developing innovative solutions and exploring advancements in artificial intelligence and software development.

PROJECT

Multi-Face Recognition and Crowd Counting   2024

- Developed a system using the MERN stack and machine learning libraries like FaceNet and MTCNN.
- The project implemented advanced facial recognition and crowd density estimation.
- Integrated features for real-time data processing and visualization.

HACKATHON EXPERIENCE

TECHXCELERATE HACKATHON 2024   2024

- Participated in a 24-hour hackathon conducted at BITS Pilani
- Ranked in the top 10% of participants

HOBBIES AND INTERESTS

- Strategic Games: Enjoy playing chess, enhancing strategic thinking and problem-solving abilities.
- Sports Enthusiast: Actively participate in badminton, fostering teamwork and physical endurance.
- Technology Trends: Passionate about exploring advancements in AI, software development, and emerging technologies.
- Creative Problem Solving: Participate in hackathons and technical events to challenge my analytical skills.

EDUCATION

Bachelor of Technology in Computer Science and Engineering (Undergraduate)   2023 - 2027
KMIT (Keshav Memorial Institute of Technology), Hyderabad
